PRACTICAL – 1

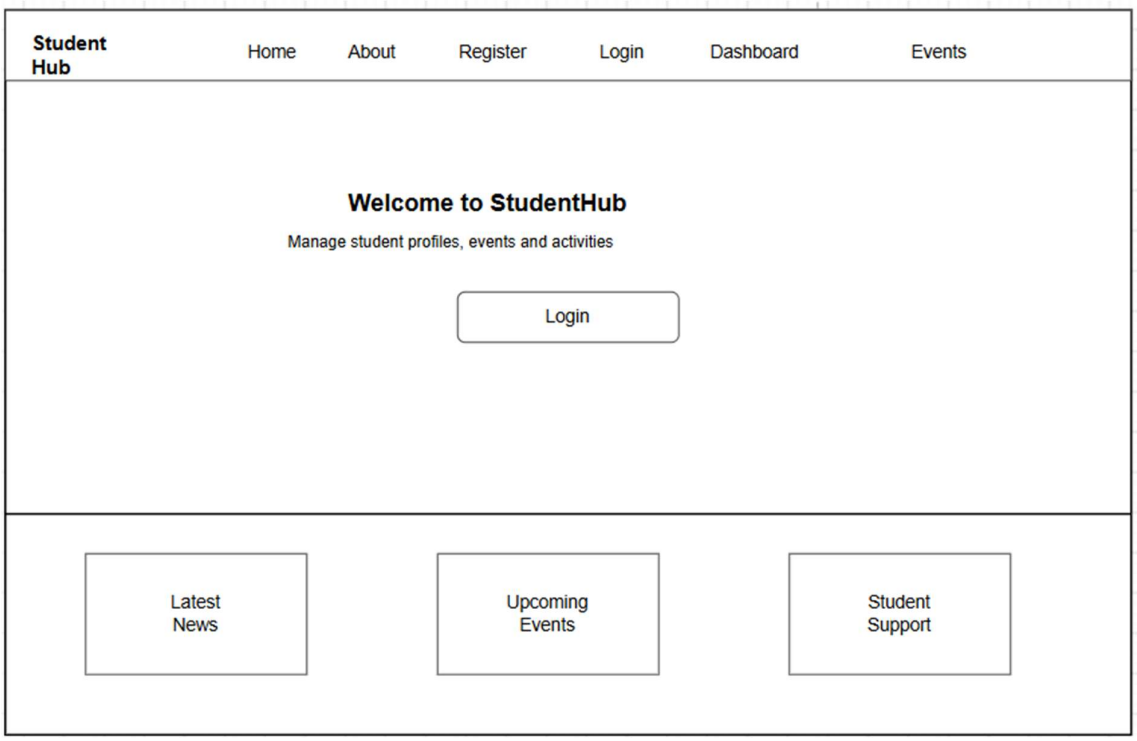

Problem Definition: Initiate the semester-long StudentHub portal by identifying the problemscope, user roles, key modules, navigation flow, and minimum 10 pages. Create a sitemap, low-fidelity wireframe, project folder structure, README file, and GitHub repository.

Code/Script/Task:

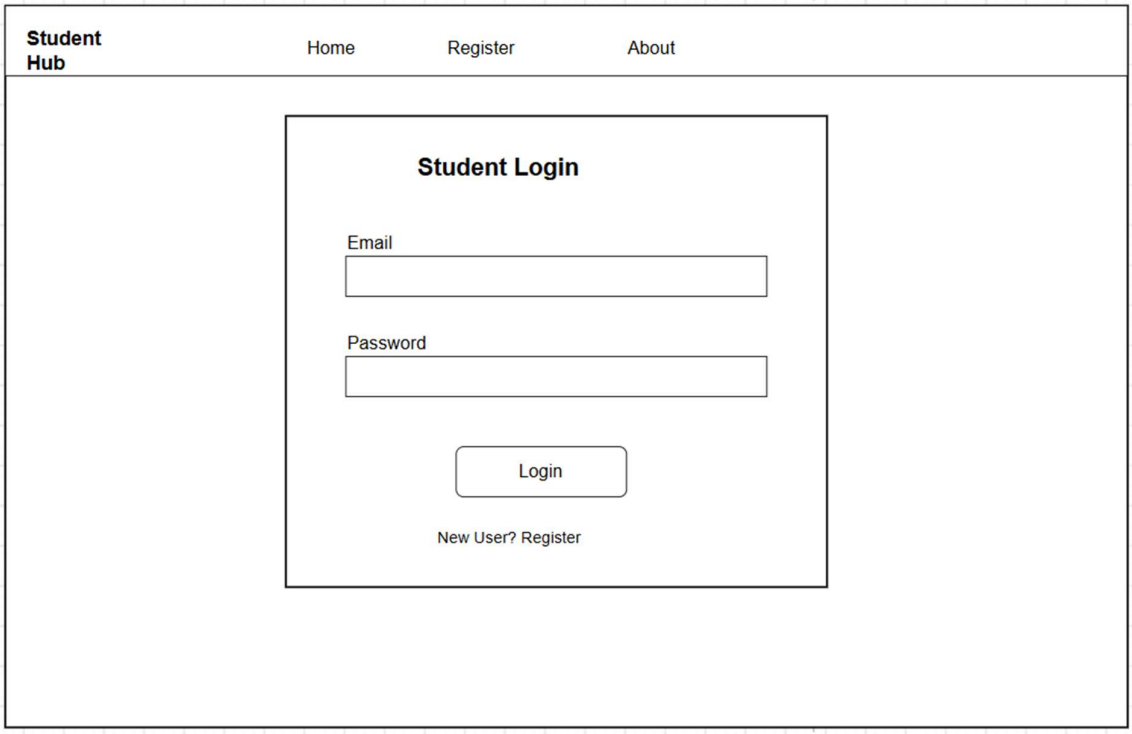

SiteMap:

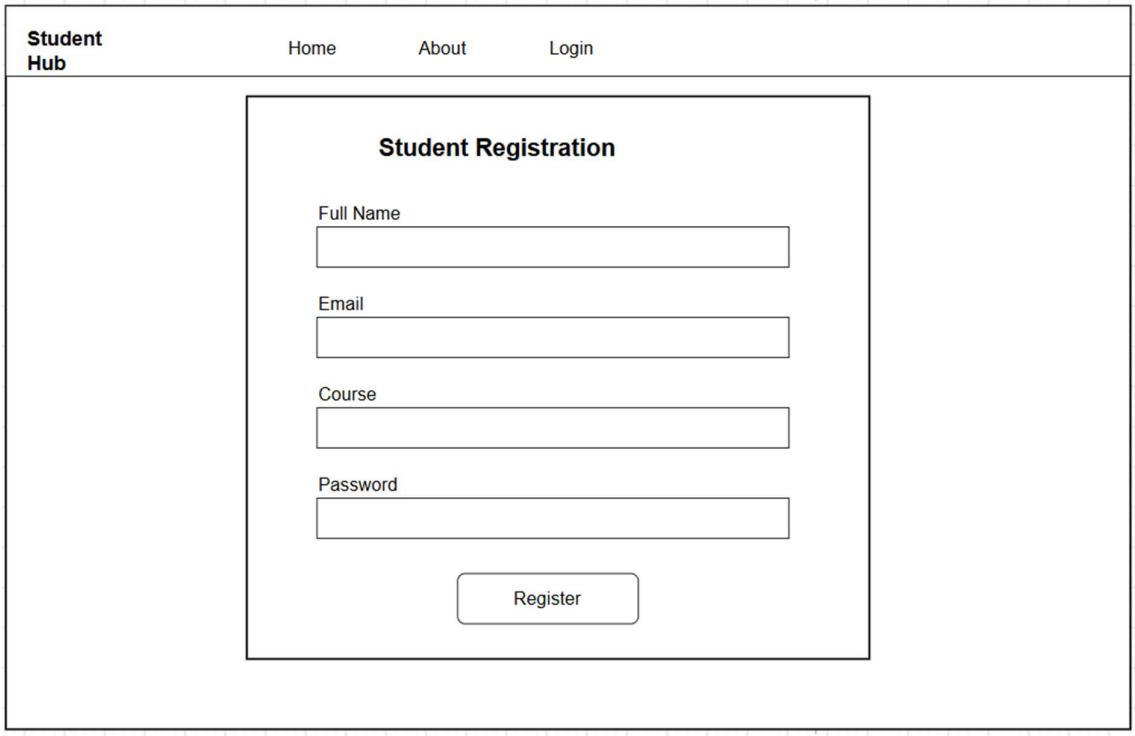

Home_Page:

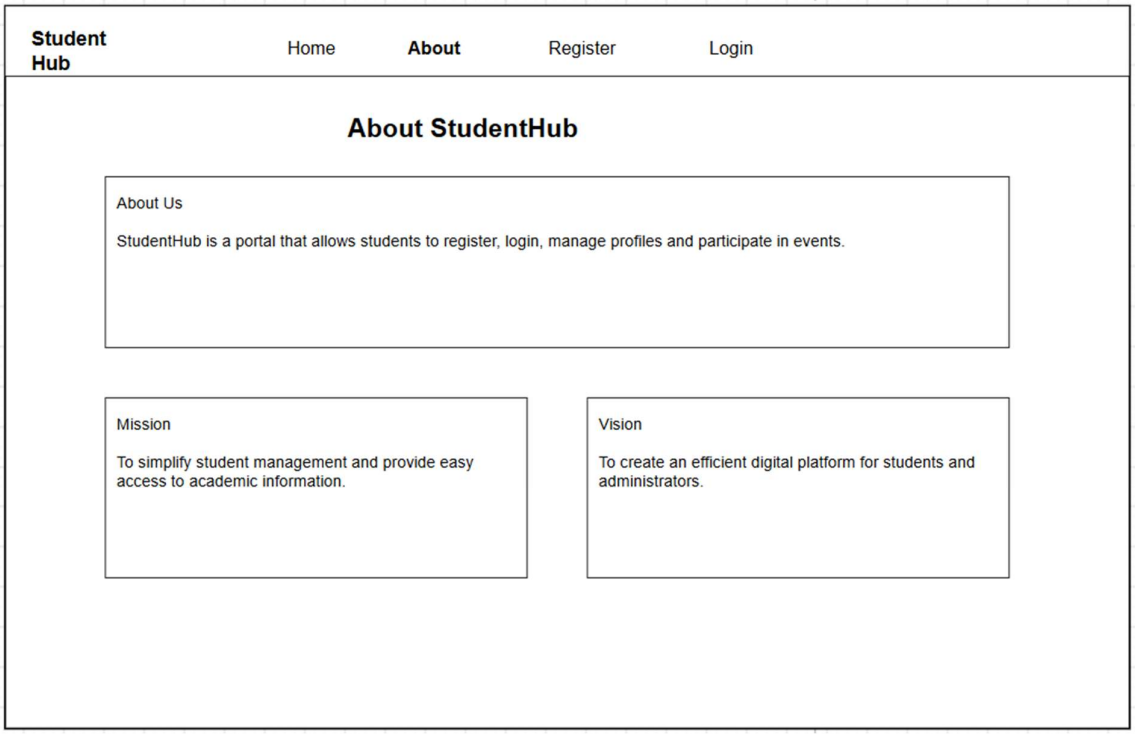

Login_page:

Register_page:

About page:

Question & Answer:

1. What is URL and parts of URL?

- A URL (Uniform Resource Locator) is the web address used to access a resource on the Internet. Its main parts are protocol, domain name, path, query string, and fragment.

2. How does HTML file processed in web browser?

- The browser requests the HTML file from the server, parses it, loads CSS/JavaScript, and renders the webpage for the user.

3. How will page navigation flow managed among all HTML pages?

- Page navigation is managed using HTML <a> (anchor) tags, allowing users to move between pages through the navigation menu.

4. How will GitHub commits be maintained after each practical?

- After each practical, changes will be committed with a meaningful message and pushed to GitHub to maintain version history and track progress.

Conclusion / Learning Outcome:

Conclusion

Successfully designed the initial structure of the StudentHub website by creating the sitemap, low-fidelity wireframes, project folder structure, README file, and GitHub repository, establishing a strong foundation for further development.

Learning Outcomes

- Understood the website planning process, including sitemap creation and wireframing.
- Learned to organize a web project, manage page navigation, and use GitHub for version control.
